

# JIRAPAT PRANUWECH

## FULL STACK DEVELOPER

**Email:** Jirapatjames@hotmail.com    **Mobile:** +66 95-879-9195    **Location:** Bang Khen, Bangkok, Thailand  
**Availability:** 1 Month

### PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer** with **5+ years** of hands-on experience designing, building, and shipping production web, mobile, and real-time applications across the full SDLC. Proven expertise in **React.js, Next.js, Vue.js, Node.js, Express.js, TypeScript**, and **ASP.NET Core (C# on .NET 8 / .NET 9)**, with strong hands-on experience in **real-time systems (SignalR, WebSocket, Firebase Realtime DB)**, cross-platform mobile development with **Flutter** for iOS and Android, and cloud services on **AWS (Lambda, S3, Rekognition)**. Solid track record of delivering enterprise **ERP, e-commerce, telematics**, and field-service platforms in **Agile** teams, backed by **PostgreSQL, MongoDB, and SQL Server**. Recognized for clean, maintainable code, strong UX/UI sensibility, and effective collaboration with product, design, and business stakeholders to turn requirements into reliable, user-focused solutions.

### CORE TECHNICAL SKILLS

|                  |                                                                                                                                                                                          |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages        | JavaScript, TypeScript, C# (.NET 8 / .NET 9, ASP.NET Core), Python, Dart, SQL, HTML5, CSS3, SCSS / SASS, C++                                                                             |
| Frontend         | React.js, Next.js, Vue.js, Vuetify, Gatsby, Redux, MUI (Material UI), Ant Design, Bootstrap, Tailwind, CSS Modules, Responsive Design, UX/UI Implementation                              |
| Backend          | Node.js, Express.js, ASP.NET Core (C#), Entity Framework Core, REST API design, RESTful Web Services, JWT Authentication, Swagger / OpenAPI, API Integration, Microservices fundamentals |
| Cloud & AWS      | AWS Lambda (serverless), AWS S3 (object storage), AWS Rekognition (image recognition), AWS SDK for .NET, Render, Docker                                                                  |
| Real-time & Push | WebSocket, SignalR (ASP.NET real-time), Firebase Realtime Database / Firestore, Firebase Cloud Messaging (FCM) push notifications, event-driven communication                            |
| Mobile           | Flutter (iOS & Android), Cross-Platform Mobile Development, Java (Android), native build pipelines                                                                                       |
| Databases        | PostgreSQL, MongoDB (NoSQL), Microsoft SQL Server, Oracle, SQLite, Prisma ORM, Entity Framework Core, schema design, query optimization                                                  |
| DevOps & Tooling | Git, GitHub, Sourcetree, Fork, Docker, Render, Turborepo, pnpm workspaces, CI/CD basics, Agile / Scrum, Code Review, Bug Tracking                                                        |
| Tools & IDEs     | Visual Studio 2017+, Visual Studio Code, Xcode, Figma, MongoDB Compass, Postman                                                                                                          |
| Soft Skills      | Problem Solving, Cross-Functional Collaboration, Requirement Gathering, Time Management, Adaptability, Mentoring, Communication                                                          |

## PROFESSIONAL EXPERIENCE

---

### MARSX THINGS CO., LTD.

May 2024 – Present

#### Full Stack Developer

- **Enterprise ERP / Sales & Leasing platform:** Build and customize **CHMWebSales** and **CAECMACH** — production **ASP.NET Core MVC (.NET 8)** web platforms deployed as multi-tenant variants for different business units. Modules cover **sales, hire-purchase / leasing, credit analysis, collections, approval workflows, call center, finance, document management, and brochure**. Implemented **role-based authorization, ChartJS** dashboards, **iTextSharp** PDF report generation, **ClosedXML** Excel export, **Microsoft Graph / Azure AD** integration, and **Entity Framework Core on PostgreSQL**.
- **Mobile (Flutter, iOS & Android):** Ship two production cross-platform apps — **MarsDone** (customer commerce / service marketplace) and **MarsServ** (driver & technician field operations) — covering service requests with driver matching, in-app chat, push notifications, OTP authentication, wallet, cart, machine management, quotation, preventive-maintenance workflows, and community announcements. Also contributed to **MarsGO** (Flutter + React taxi app).
- **Backend (.NET 8 / .NET 9, ASP.NET Core, C#):** Designed and maintain multiple REST APIs and services — **MarsXApps.API** (mobile backend), **WebMarsDoneCRM** (CRM web app), **CAECMiddleware** (client-system integration layer), and **MarsGoAPI** (taxi / telematics: .NET 9 + Entity Framework Core + PostgreSQL + JWT + Swagger).
- **Real-time (SignalR):** Built **MarsXHubs** — the ASP.NET Core SignalR service powering in-app chat, driver-job status updates, and live dispatch events across mobile and web clients.
- **Computer Vision on AWS:** Contributed to **MarsVision** (.NET 9) — an image-recognition system leveraging **AWS Rekognition, AWS S3, AWS Lambda** (serverless), and **SkiaSharp** for image processing.
- **Web (React):** Develop and maintain **MarsxGPS** — a GPS telematics dashboard built with **React + Material UI** (marstian.com) for fleet and vehicle tracking. Customize React-based ERP modules to UX/UI specifications.
- **Push notifications:** Integrated **Firebase Cloud Messaging (FCM)** for iOS and Android push delivery.
- Collaborate closely with product owners and end users to translate feedback into rapid iterations.

### ADIUS GAMING COMPANY LIMITED

Jan 2024 – May 2024

#### Full Stack Developer

- Designed and delivered a **top-up payment web application** from scratch — architected the project, integrated payment workflows, and deployed to production.
- Built scalable **REST APIs with Express.js and TypeScript**, applying strong typing and modular design to improve reliability and maintainability.
- Modeled and operated **MongoDB** as the primary datastore, defining schemas and indexes optimized for transaction-heavy workloads.
- Developed companion **cross-platform mobile applications using Flutter**, backed by Express.js services, to extend the platform to smartphone users.

### ADIUS GAMING COMPANY LIMITED

Dec 2022 – Jan 2024

#### Front-End Developer

- Bootstrapped, tested, and deployed marketing **landing pages with React.js**, focusing on performance, SEO-friendly markup, and conversion-oriented UX.
- Built a **back-office and admin web application with Vue.js**, delivering reusable components and an intuitive interface for internal operators.
- Owned the full frontend pipeline — project setup, framework configuration, testing, and release.

## SO-AT SOLUTION CO., LTD.

Nov 2020 – Nov 2022

### *Software Developer*

- Developed and maintained enterprise **ASP.NET web applications in C# .NET**, leveraging **DevExpress**, JavaScript, and SQL to deliver feature-rich business tools.
- Gathered requirements directly from business users and translated them into custom features, demonstrating strong client-facing communication.
- Designed, implemented, and tested new modules end-to-end; performed bug fixing and provided **technical support to end users**.
- Built and maintained efficient, reliable production systems serving daily business operations.

## TOT INNOVATION INSTITUTE

Internship

### *Developer Intern*

- Developed and maintained internal **web applications using ASP.NET, C#, and SQL**.
- Designed, implemented, and tested new features in **Android mobile applications using Java**.

## PERSONAL PROJECTS

---

### SiamBox — Thailand → China Cross-Border E-commerce Platform

Personal Project

#### Full Stack Developer · Solo Architect

- Architected and built a **cross-border e-commerce platform** as a **Turborepo + pnpm monorepo** with three apps (customer web, admin dashboard, REST API) and shared internal packages (database, shared types, UI).
- Developed the storefront and admin with **Next.js 15, React 19, TypeScript, and Tailwind CSS**, including **internationalization (next-intl)** for Thai and Chinese audiences.
- Built the backend service with **Node.js, Express, and TypeScript**, applying **Zod** schema validation, **Helmet** security headers, **Multer + Sharp** for image upload & processing, and **Swagger** for API documentation.
- Designed the data layer with **Prisma ORM on PostgreSQL**, defining schemas and migrations for products, orders, users, and inventory.
- Integrated **Omise payment gateway** for Thai-market checkout and packaged the platform with **Docker** for deployment on **Render**.

### LiveQuiz — Real-time Multiplayer Quiz Game

Personal Project

#### Full Stack Developer

- Built a **real-time multiplayer quiz game** (Kahoot-style) supporting concurrent players joining hosted game rooms from any device.
- Engineered the realtime layer using **Firebase Realtime Database** for instant state sync across Host, Player, Display, and Scoreboard clients.
- Designed a **multi-role architecture** — host controls, player join/answer flow, big-screen display view, and live scoreboard — each as a dedicated client surface.
- Developed the frontend with **JavaScript, HTML5, CSS3, and Bootstrap 5**, optimized for responsive play on both mobile and desktop.
- Implemented countdown timers, scoring logic, and question lifecycle management with smooth animations and clear UX feedback.

### Multi-Tenant POS & Inventory SaaS

Personal Project

#### Full Stack Developer · Solo Architect

- Designed and built a production-grade **multi-tenant SaaS** for retail POS and inventory, with strict **data isolation** across tenants enforced by JWT-injected **tenant\_id** middleware and mandatory `WHERE tenant_id = ?` filters on every query.
- Developed the frontend with **React + Vite** and the backend with **Node.js + Express**, persisting data in **SQLite (Better-SQLite3)** with **JWT** authentication.
- Engineered **atomic transactions with immediate locking** to prevent race conditions on stock deduction — verified by a concurrency-simulation script that hammers the API with parallel sales of the last stock item.
- Implemented **role-based access control (RBAC)** (admin vs. cashier), **audit logging** of errors and deadlocks to a `system_logs` table, and automatic **rollback** on partial-failure scenarios.
- Wrote **Jest unit and integration tests** covering authentication, cross-tenant isolation, transactional integrity (over-selling prevention), and RBAC enforcement.

## EDUCATION

---

### Rangsit University

2015 – 2020

Bachelor of Engineering (B.Eng.), Computer Engineering

## LANGUAGES

---

**Thai** — Native | **English** — Conversational (Reading, Writing, Listening)

## ADDITIONAL INFORMATION

---

**Personal:** Date of Birth — 3 May 1997 | Nationality — Thai | Marital Status — Single

**Keywords:** Full Stack Developer, Software Engineer, Web Developer, Frontend Developer, Backend Developer, Mobile Developer, JavaScript, TypeScript, React.js, Next.js, Vue.js, Node.js, Express.js, REST API, RESTful API, ASP.NET, ASP.NET Core, C#, .NET 8, .NET 9, .NET Core, MongoDB, SQL Server, Oracle, SQLite, NoSQL, Prisma, Flutter, Dart, iOS, Android, Cross-Platform, HTML5, CSS3, SCSS, SASS, Tailwind, MUI, Ant Design, Bootstrap, Redux, Git, GitHub, Agile, Scrum, SDLC, ERP, CI/CD, UX/UI, Responsive Design, Single Page Application, SPA, API Integration, Microservices, WebSocket, SignalR, Firebase, Firebase Realtime Database, Firestore, Firebase Cloud Messaging, FCM, Push Notifications, Real-time Communication, Entity Framework Core, EF Core, Swagger, OpenAPI, AWS, AWS Lambda, AWS S3, AWS Rekognition, Serverless, ERP, Sales, Leasing, Hire-Purchase, Credit Analysis, ChartJS, iTextSharp, ClosedXML, Microsoft Graph, Azure AD, SaaS, Multi-Tenant Architecture, RBAC, Concurrency Control, Atomic Transactions, Jest, Unit Testing, Integration Testing, Python.
